

Announcement from former SME factory Service Manager Brian Laker

After 38 years working for the famous SME audio company (SME Ltd), I have now set up a completely independent service and repair business, Mr SME, providing aftermarket service and repair of SME tonearms.

As an SME factory trained turntable and tonearm expert with vast product knowledge, I have set up a fully equipped workshop to perform tonearm service and repair work to the highest standards using specialist tooling and measurement equipment.

During my time at SME as the factory service manager I have encountered every aspect of customer returned SME tonearms ranging from being in excellent to very poor (un-operational) condition. My new workshop will provide the highest level of service, care and detail expected.

Tonearms sent for service or repair will be fully stripped down, thoroughly cleaned, detailed inspected, bearings checked/replaced, parts polished and lubricated. In addition, the tonearm will be re-wired with market leading high specification cable. Final inspection will include comprehensive mechanical and electrical testing plus calibration using custom-made measuring equipment. Throughout the process if any part(s) are found damaged, options will be presented.

I am based just a few miles from the SME factory in the heart of West Sussex, England. A new Mr SME website is under development which will provide full details and service information.
